

Aluminum

Aluminum alloy 5052 is offered because of its strength, corrosion resistance and value. Aluminum presents a naturally beautiful luster regardless of the finish chosen. Some of the most popular options include satin, mirror polish, paint or powder coat. Natural aluminum is protected with weatherometer proven, clear interior lacquer or exterior powder coat.

Stainless Steel

Stainless Steel alloy 304 is a general purpose alloy, very durable and easy to maintain in exterior and interior applications. Alloy 316 performs better in highly corrosive, salt air environments, such as industrial, coastal vicinities or areas know for high levels of atmospheric pollution. All stainless steel products are automatically passivated when in exterior applications. This process aids in inhibiting oxidation and staining.
